140 North Senate Avenue, Room 306
Indianapolis, IN 46204

To Whom It May Concern:

The Wayne County Board of Commissioners offers our full support of the proposed state wide aerial photography project. It is our understanding this will be full color, one-foot pixel photography.

The current aerial photography that we have available is used by members of city and county government and members of the public. It has proven to be a great asset and tool for our township assessors.

Our local Economic Development Corporation has made use of our current aerial photography to aid in promoting our Midwest Industrial Park and Gateway Industrial Park. Upgraded images would give Wayne County and the State of Indiana an advantage in selling our industrial parks to interested developers.

We ask your consideration and support of this very important upgrade to the GIS technology.

Sincerely,

WAYNE COUNTY BOARD OF COMMISSIONERS

Thomas A. Dickman
